PROFESSIONAL SUMMARY

B.Tech Computer Science undergraduate with hands-on experience in software development, AI/ML fundamentals, and UI/UX design. Proven ability to build interactive applications, data-driven dashboards, and inclusive technology solutions through academic research and industry internships. Strong communicator with leadership experience in IEEE and a keen interest in assistive and impact-driven innovation.

PROFESSIONAL EXPERIENCE

Summer Intern
National Institute of Technology Calicut (NIT Calicut) | June 2025 – July 2025
Centre for Information Technology Research & Automation

- Developed interactive dashboards using **JavaFX** for real-time monitoring of circuit breaker parameters.
- Designed configurable data visualizations using JavaFX charts and UI components to improve system responsiveness and fault analysis.
- Implemented and tested the application in Apache NetBeans under research faculty mentorship from the Department of Computer Science & Engineering.

Intern-Revertech IT Solutions | April 2024 – May 2024

- Developed Python scripts for drone-based data collection, reducing manual processing time by 30%.
- Trained machine learning models for image-based item recognition
- Gained practical exposure to applied AI workflows and real-world datasets.

EDUCATION

Bachelor of Technology – Computer Science Engineering
Sahrdaya College of Engineering & Technology (Autonomous)
Affiliated to APJ Abdul Kalam Technological University
2023 – 2027 | CGPA: 8.6 / 10 (up to Semester 4)

Higher Secondary (PCM with Computer Science)
Kerala DHSE | 2023 | 98.5%

Secondary School (ICSE)
2021 | 96%

PROJECTS

- **PixiePath** *(Oct 2025)*
  Inclusive educational platform designed for children with ADHD, focusing on personalized learning flows, accessibility-driven UI, and engagement-oriented content design.

- **ÓL – Assistive Smart Water Bottle with Pill Dispenser** *(Sep 2025)*
  IoT-enabled assistive device integrated with a web application to provide medication reminders, pill organization, and usage tracking for elderly and neurodivergent users.
- **Early Cataract Detection App** *(Mar 2025)*
  AI & ML-based screening application that analyzes eye images to detect early signs of cataracts, supporting faster and more accessible preliminary diagnosis.
- **HopLift** *(Oct 2024)*
  Smart carpooling application promoting sustainable mobility through optimized ride matching, route planning, and user-friendly mobile interface design.
- **Rexa** *(Jan 2022)*
  Interactive humanoid robot developed as a robotics and AI project, capable of basic human interaction using sensor integration and programmed responses.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C, C++, JavaScript
- **Web Technologies:** HTML5, CSS3, MERN Stack, MySQL
- **Developer Tools & IDEs:** Visual Studio Code, NetBeans (JavaFX), GitHub, Figma, Overleaf
- **Machine Learning & AI:** Image Processing, Machine Learning Fundamentals, Model Training, TensorFlow
- **Development Practices:** Frontend Development, UI/UX Design, Technical Writing, Digital Marketing

LEADERSHIP & VOLUNTEERING EXPERIENCES

Electronic Communications Coordinator
IEEE Computer Society Kerala Chapter | Jan 2025 – Present

- Led digital outreach strategies, increasing event visibility by 20% and engagement by 15%.
- Streamlined communication workflows,coordinated volunteer team ,designed the official technical newsletter 'Compile-Edition 1&2' while maintaining IEEE compliance standards.

Secretary
IEEE Student Branch, Sahrdaya College of Engineering & Technology | Jan 2025 – Present

- Coordinated technical events, workshops, and hackathons, improving student participation by 25%.
- Managed documentation, scheduling, and inter-team communication.

Chairperson
IEEE Nuclear & Plasma Sciences Society Chapter | Dec 2023 – Dec 2024

- Organized technical talks and workshops on emerging technologies.
- Strengthened collaboration with allied IEEE societies, increasing cross-chapter participation.

CERTIFICATIONS & OTHER ACHIEVEMENTS

- **STRIDE Assistive Designathon (K-DISC) – *Best Viable Project Award* (2025)**
  Recognized for developing an inclusive assistive technology solution with real-world impact.
- **5-Day Bootcamp on Drone & Allied Technologies – NIELIT Calicut (2025)**
  Trained in drone systems, data acquisition, and real-world technology applications.
- **Compile Newsletter – IEEE Computer Society Kerala Chapter (2024–2025)**
  Designed and published technical newsletters to improve outreach and member engagement.
