PROFESSIONAL SUMMARY

Final-year Computer Science Engineering undergraduate with experience building full-stack web applications, AI-assisted software solutions, and developer-focused products. Proficient in Java, Python, TypeScript, React, FastAPI, Firebase, SQL, and Git, with hands-on experience developing responsive web applications and scalable software solutions. Passionate about software engineering, product development, and building technology that solves real-world problems.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, JavaScript, TypeScript
Frontend Development: React, HTML5, CSS3, Tailwind CSS
Backend & Cloud: FastAPI, AWS
Databases: MySQL, Firebase Firestore
AI / ML: TensorFlow, OpenCV, Computer Vision, Machine Learning, Image Processing
Developer Tools: Git, GitHub, JavaFX, VS Code, Apache NetBeans, Figma
Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Responsive Web Design, Component-Based Architecture, Software Design Principles, Version Control (Git)

PROFESSIONAL EXPERIENCE

Summer Research Intern **June 2025 – July 2025**
Centre for Information Technology Research & Automation (CITRA), National Institute of Technology Calicut

- Developed a JavaFX desktop application for visualizing electrical circuit breaker monitoring data.
- Designed reusable visualization modules to support infrastructure monitoring and operational analysis.
- Built responsive graphical user interfaces using JavaFX and Apache NetBeans.
- Collaborated with a research team to develop software supporting electrical infrastructure monitoring.

Project Lead Intern **January 2026 – July 2026**
Social Technology and Research for Inclusive Design Excellence (STRIDE), K-DISC Student Leadership Team

- Led development of accessibility-focused technology solutions addressing real-world community challenges.
- Coordinated multidisciplinary teams of developers, designers, and researchers throughout the software development lifecycle.
- Conducted user research to translate accessibility requirements into software features.

AI & Machine Learning Intern **April 2024 – May 2024**
Revertech IT Solutions

- Completed training in Python, Machine Learning, and Computer Vision fundamentals.
- Implemented introductory image processing applications using OpenCV.
- Worked with sample datasets to understand machine learning workflows.

SOFTWARE PROJECTS

Bubbles – Inclusive Learning Platform
Tech Stack: React • TypeScript • Firebase • Tailwind CSS
GitHub: github.com/bridg3alt/Bubbles

- Built an accessibility-focused full stack web application providing personalized learning experiences.

- Developed responsive UI components using React, TypeScript, and Tailwind CSS.
- Integrated Firebase Authentication and Cloud Firestore for application data management.
- Designed modular software architecture supporting adaptive learning workflows.

ÓL – IoT Smart Water Bottle with Medication Reminder
Tech Stack: IoT • Embedded Systems • Web Technologies
GitHub: github.com/bridg3alt/Olvia

- Designed an IoT-enabled assistive healthcare prototype integrating hydration monitoring and medication reminders.
- Developed software workflows for notification management and user activity tracking.
- Awarded Best Viable Idea at the K-DISC STRIDE Assistive Designathon.

ResilienceScout-Climate Risk Assessment & Decision Support Platform
Tech Stack: React • TypeScript • FastAPI • Python • Git
GitHub: github.com/bridg3alt/ResilienceScout

- Developing a full-stack web application for climate risk assessment and infrastructure resilience analysis.
- Built responsive frontend interfaces using React and TypeScript for data visualization.
- Designed modular backend services using FastAPI to support analytical workflows.
- Developed scalable software architecture for hazard analysis and infrastructure decision-support.

EDUCATION

B.Tech – Computer Science Engineering
Sahrdaya College of Engineering & Technology (Autonomous)
APJ Abdul Kalam Technological University
2023–2027 | CGPA: **8.14/10** (up to Semester 6)
Higher Secondary (PCM with Computer Science)
Kerala DHSE | 2023 | **98.5%**
Secondary School (ICSE)
2021 | **96%**

LEADERSHIP EXPERIENCE

Initiative Lead **March 2026 – Present**
IEEE ProComm & TEMS Student Leadership Team — IEEE Kerala Section

- Lead cross-functional teams to organize technology, innovation, and entrepreneurship initiatives across IEEE Kerala Section.

Electronics & Communications Coordinator **January 2025 – January 2026**
IEEE Computer Society Kerala Chapter

- Designed and published the official *Compile* technical newsletter and managed technical communications.

Secretary **January 2025 – January 2026**
IEEE Student Branch — Sahrdaya College of Engineering & Technology

- Coordinated technical workshops, hackathons, and engineering events for a 400+ member student community.

ACHIEVEMENTS & CERTIFICATIONS

IDEA International Travel Support Grant Awardee – IEEE International Conference on Robotics and Automation (ICRA 2026), Vienna, Austria
Best Viable Idea Award — STRIDE Assistive Hackathon, K-DISC (2025)
Intel AI for Future Workforce Program — Intel (2025)
Allied Technologies for UAS/Drone — NIELIT Calicut (2025)
